Jonah Wang

wang.jonah1@northeastern.edu | (512) 947-5397 | linkedin.com/in/jonah-wang-jw | Boston, MA

Education

Northeastern University | Boston, MA Graduation: May 2028
Candidate for Bachelor of Science in Mechanical Engineering
Relevant Courses: Fluid Mechanics, Dynamics, Mechanics of Materials, Thermodynamics
Certifications: SOLIDWORKS CAD Design Associate
Extracurricular Activities: NU Mars Rover, American Society of Mechanical Engineers (ASME), NU Auto Club
Study Abroad: Queens University Belfast, Belfast, United Kingdom

Technical Interest

Applications: Solidworks, AutoCAD, Lightworks, Adobe Premier, Google Suite, Microsoft Office Suite
Technical Interests: Automotive Mechanics, Computer Hardware Assembly, Precision Woodworking

Work Experience

KPO Engineering Intern | *Innofiber* **|** Sterling, MA Jan 2026 - Present

- Fabricate custom movable workstations to accommodate operator ergonomics and flow line expansion
- Utilize Solidworks to create custom fixtures to assist in fiber cable manufacturing and increase operator efficiency
- Develop SQL based queries to analyze inventory usage and identify excess and obsolete inventory, reducing kitting time and supporting lean manufacturing initiatives
- Calibrate custom fixturing by adjusting dial indicator location to ensure repeatable testing within 0.001”, supporting quality control standards

Projects

Vehicle Restoration Project | 1997 Toyota Rav4 June 2025 - Mar 2026

- Retrofitted and implemented modern media system requiring manual wire splicing for 12 connections, dashboard modification, and head unit bracket fabrication
- Performed preventive maintenance including fluid dynamic analysis for transmission, coolant, brake, and hydraulic systems
- Restored exterior lighting functionality by replacing fuses, replacing LEDs, and addressing voltage drops

UV Lens Filter Housing | NU Mars Rover Dec 2025 - Feb 2026

- Reviewed camera datasheets and calculated tolerances to design a housing with a precision UV film insert
- Rapid-prototyped a modular housing using Solidworks to mitigate Mars-like glare while maximizing rigidity

How Healthy is Your Water? Feb 2025 - April 2025

- Created a travelling museum for children ages 6-11 by collaborating with a team of 4 engineering students over 7 weeks
- Designed and implemented waterproof housing for 4 Arduino components in using Solidworks
- Attained a deeper understanding of the engineering design process by applying three of the most efficient solution generation methods in three weeks

Volunteer Experience

Youth Camp Counselor | Austin, TX Summer 2023, Summer 2024

- Enabled outdoor activities for youth by preparing and maintaining venue grounds of 50,000 square feet
- Mentored 20 middle school aged youth through explanation of Scriptural themes and lessons for two summers

Interests

Personal Interests: Photography, Fishing, Woodworking, Powerlifting, Golf
